

Subpart I—Consistency of Federal Activities Having Interstate Coastal Effects

§ 930.150 Objectives.

(a) A federal activity may affect coastal uses or resources of a State other than the State in which the activity will occur. Effective coastal management is fostered by ensuring that activities having such reasonably foreseeable interstate coastal effects are conducted consistent with the enforceable policies of the management program of each affected State.

(b) The application of the federal consistency requirement to activities having interstate coastal effects is addressed by this subpart in order to encourage cooperation among States in dealing with activities having interstate coastal effects, and to provide States, local governments, Federal agencies, and the public with a predictable framework for evaluating the consistency of these federal activities under the Act.

§ 930.151 Interstate coastal effect.

The term “interstate coastal effect” means any reasonably foreseeable effect resulting from a federal action occurring in one State of the United States on any coastal use or resource of another State that has a federally approved management program. Effects are not just environmental effects, but include effects on coastal uses. Effects include both direct effects which result from the activity and occur at the same time and place as the activity, and indirect (cumulative and secondary) effects which result from the activity and are later in time or farther removed in distance, but are still reasonably foreseeable. Indirect effects are effects resulting from the incremental impact of the federal action when added to other past, present, and reasonably foreseeable actions, regardless of what person(s) undertake(s) such actions. The term “affects” means have an effect on. Effects on any coastal use or resource may also be referred to as “coastal effects.”

§ 930.152 Application.

(a) This subpart applies to federal actions having interstate coastal effects, and supplements the relevant requirements contained in 15 CFR part 930, subparts C (Consistency for Federal Agency Activities), D (Consistency for Activities Requiring a Federal License or Permit), E (Consistency for OCS Exploration, Development and Production Activities) and F (Consistency for Federal Assistance to State and Local Governments). Except as otherwise provided by this subpart, the requirements of other relevant subparts of part 930 apply to activities having interstate coastal effects.

(b) Federal consistency is a requirement on federal actions affecting any coastal use or resource of a State with a federally-approved management program, regardless of the activities' locations (including States without a federally approved management program). The federal consistency requirement does not alter a coastal State's jurisdiction. The federal consistency requirement does not give States the authority to review the application of laws, regulations, or policies of any other State. Rather, the Act allows a management program to review federal actions and may preclude federal action as a result of a State objection, even if the objecting State is not the State in which the activity will occur. Such objections to interstate activities under subparts D, E and F may be overridden by the Secretary pursuant to subpart H of this part.

§ 930.153 Coordination between States in developing coastal management policies.

Coastal States are encouraged to give high priority to:

- (a) Coordinating State coastal management planning, policies, and programs with respect to contiguous areas of such States;
- (b) Studying, planning, and implementing unified coastal management policies with respect to such areas; and

(c) Establishing an effective mechanism, and adopting a federal-State consultation procedure, for the identification, examination, and cooperative resolution of mutual problems with respect to activities having interstate coastal effects.

§ 930.154 Listing activities subject to routine interstate consistency review.

(a) *Geographic location of listed activities.* Each coastal State intending to conduct a consistency review of federal activities occurring in another State shall:

(1) List those Federal agency activities, federal license or permit activities, and federal assistance activities that the State intends to routinely review for consistency; and

(2) Generally describe the geographic location for each type of listed activity.

(b) In establishing the geographic location of interstate consistency review, each State must notify and consult with the State in which the listed activity will occur, as well as with relevant Federal agencies.

(c) *Demonstrate effects.* In describing the geographic location for interstate consistency reviews, the State agency shall provide information to the Director that coastal effects from listed activities occurring within the geographic area are reasonably foreseeable. Listed activities may have different geographic location descriptions, depending on the nature of the activity and its effects on any coastal use or resource. For example, the geographic location for activities affecting water resources or uses could be described by shared water bodies, river basins, boundaries under the State's coastal nonpoint pollution control program, or other ecologically identifiable areas.

(d) *Director approval.* State agencies shall submit their lists and geographic location descriptions developed under this section to the Director for approval as a routine program change under subpart H of 15 CFR part 923. Each State submitting this program change shall include evidence of consultation with States in which the activity will occur, evidence of consulta-

tion with relevant Federal agencies, and any agreements with other States and Federal agencies regarding coordination of activities.

(e) *State failure to list interstate activities.* A coastal State that fails to list federal activities subject to interstate review, or to describe the geographic location for these activities, under paragraphs (a) through (d) of this section, may not exercise its right to review activities occurring in other States, until the State meets the listing requirements. The listing of activities subject to interstate consistency review, and the description of the geographic location for those listed activities, should ensure that coastal States have the opportunity to review relevant activities occurring in other States. States may amend their lists and geographic location descriptions pursuant to the requirements of this subpart and subpart H of 15 CFR part 923. States which have complied with paragraphs (a) through (d) of this section may also use the procedure at § 930.54 to review unlisted activities. States will have a transition period of 18 months from the date this rule takes effect. In that time a State may review an interstate activity pursuant to § 930.54 of this part. After the transition period States must comply with this subpart in order to review interstate activities.

§ 930.155 Federal and State agency coordination.

(a) Identifying activities subject to the consistency requirement. The provisions of this subpart are neither a substitute for nor eliminate the statutory requirement of federal consistency with the enforceable policies of management programs for all activities affecting any coastal use or resource. Federal agencies shall submit consistency determinations to relevant State agencies for activities having coastal effects, regardless of location, and regardless of whether the activity is listed.

(b) *Notifying affected States.* Federal agencies, applicants or applicant agencies proposing activities listed for interstate consistency review, or determined by the Federal agency, applicant or applicant agency to have an effect
